

IPET 132 “PARAVACHASCA”

- **CURSOS:** 6to “A” , “B” y “C”
- **ESPACIO CURRICULAR:** INGLÉS
- **PROFESORES:** VILLAGRA, AYLÉN CELESTE

SECUENCIA N°4: ADJETIVOS COMPARATIVOS

OBJETIVOS:

- ★ Comprender y aplicar los adjetivos comparativos en contextos técnicos simples.
- ★ Describir y comparar máquinas, herramientas, procesos o materiales.
- ★ Desarrollar competencias comunicativas básicas para situaciones del ámbito técnico.
- ★ Identificar la estructura gramatical de los adjetivos comparativos.
- ★ Usar comparaciones para describir diferencias entre objetos, procesos o materiales comunes en la especialidad.
- ★ Producir oraciones orales y escritas usando comparativos.

CONTENIDO GRAMATICAL:

✏ EXPLICACIÓN: Adjetivos Comparativos

Los comparativos se usan para comparar **dos personas, objetos, máquinas, lugares o procesos**.

✚ Estructura general:

- Para adjetivos cortos (1 sílaba):
adjetivo + -er + than
Example: The machine is **faster than** the old one.
- Para adjetivos largos (2+ sílabas):
more + adjetivo + than
Example: This motor is **more efficient than** the previous model.
- Casos irregulares:
 - good → **better than**
 - bad → **worse than**

Tipo de adjetivo	Regla para formar el comparativo	Ejemplo
Corto (1 sílaba)	adjetivo + -er + than	small → smaller than
Termina en -e	solo se agrega -r + than	large → larger than

Tipo de adjetivo	Regla para formar el comparativo	Ejemplo
Termina en consonante + vocal + consonante	duplicar la consonante final + -er + than	big → bigger than
2 sílabas y termina en -y	cambiar -y por -i y agregar -er + than	easy → easier than
Largo (2+ sílabas)	more + adjetivo + than	efficient → more efficient than
Irregulares	cambio completo	good → better than / bad → worse than

GLOSARIO DE ADJETIVOS ÚTILES EN CONTEXTO TÉCNICO

Adjetivo	Significado	Comparativo
fast	rápido	faster than
slow	lento	slower than
cheap	barato	cheaper than
expensive	caro	more expensive than
heavy	pesado	heavier than
light	liviano	lighter than
old	viejo	older than
modern	moderno	more modern than
powerful	potente	more powerful than
safe	seguro	safer than
noisy	Ruidoso	noisier than
clean	limpio	cleaner than

✂ ACTIVIDAD 1: Fill in the blanks

Completa las oraciones con la forma comparativa del adjetivo entre paréntesis.

1. This machine is _____ than that one. (old)
 2. The drill is _____ than the saw. (easy)
 3. Gold is _____ than silver. (expensive)
 4. The manual tool is _____ than the automatic one. (light)
 5. The old lathe is _____ than the new one. (noisy)
-

✂ ACTIVIDAD 2: Choose the correct option

Elige la opción correcta para completar cada oración.

1. This factory is (bigger / more bigger) than the other one.
 2. New trains are (safer / more safe) than old trains.
 3. This program is (faster / more fast) than before.
 4. The manual pump is (lighter / more light) than the electric pump.
 5. New engines are (more powerful / powerfuller) than old ones.
-

✂ ACTIVIDAD 3: Correct the mistakes

Corrige los errores en estas oraciones comparativas.

1. This car is **more cheaper** than that one.
2. That drill is **more fast** than the lathe.
3. The new system is **gooder than** the old one.
4. This machine is **expensiver than** the other.
5. The process is **more easier than** before.

📖 ACTIVIDAD 4: Lectura técnica adaptada (Industria de Procesos)

Título: *Comparing Filtration Systems*

Tema: Comparación de dos sistemas de filtrado industrial.

🔍 **Texto:**

In a food processing plant, filtration is very important. The **membrane filter** is **more efficient than** the **sand filter**.

It is also **faster than** the sand filter because it works with higher pressure.

However, the sand filter is **cheaper than** the membrane filter.

The membrane filter is **smaller than** the sand filter, but it is also **more expensive**.

In conclusion, the membrane filter is better for **modern and clean processes**, while the sand filter is better for **basic operations**.

Actividades post-lectura:

A. Verdadero o falso: Marca las oraciones como **True (T)** o **False (F)**.

1. The membrane filter is slower than the sand filter.
2. The sand filter is cheaper than the membrane filter.
3. The membrane filter is better for simple processes.
4. The membrane filter is more efficient than the sand filter.
5. Both filters are the same size.

B. Completar con el comparativo correcto: Usa los adjetivos entre paréntesis para completar con la forma comparativa.

1. The membrane filter is _____ than the sand filter. (efficient)
2. The sand filter is _____ than the membrane filter. (cheap)
3. The membrane filter is _____ than the sand filter. (small)
4. The membrane filter is _____ than the old system. (modern)

C. Preguntas abiertas (respuesta corta):

1. Which filter is better for clean processes?
2. Which filter is more expensive?
3. Why is the membrane filter faster?

TEXTO: Choosing the Right Motor (Electromecánica)

In Electromechanics, choosing the right motor is important. A DC motor is **faster than** an AC motor, but the AC motor is **more efficient than** the DC motor.

Small motors are **lighter than** big ones. However, big motors are **stronger and more powerful than** small ones.

Modern motors are also **quieter than** older motors.

Actividades post-lectura

A. Verdadero o Falso (True or False) Escribe **T** (true) o **F** (false) según el texto:

1. A DC motor is more efficient than an AC motor. ____
2. Big motors are heavier than small ones. ____
3. Modern motors are noisier than older ones. ____
4. AC motors are faster than DC motors. ____
5. Choosing the right motor is important in Electromechanics. ____

B. Completa las oraciones con el adjetivo comparativo correcto

1. A DC motor is _____ than an AC motor. (fast)
2. An AC motor is _____ than a DC motor. (efficient)
3. Small motors are _____ than big motors. (light)
4. Big motors are _____ than small motors. (powerful)
5. Modern motors are _____ than old ones. (quiet)

C. Opción múltiple: elige la opción correcta

1. A DC motor is _____ than an AC motor. a) more efficient b) faster c) quieter
2. AC motors are _____ than DC motors. a) faster b) more efficient c) lighter
3. Big motors are _____ than small motors. a) stronger b) weaker c) smaller
4. Modern motors are _____ than old motors. a) noisier b) more noisy c) quieter

D. Responde con tus propias palabras (respuestas simples)

1. Which motor is more efficient: the DC or the AC motor?
2. Are small motors stronger or lighter than big motors?
3. How are modern motors different from old motors?
4. Why is it important to choose the right motor?

Criterios de evaluación:

- Presentar este trabajo **completo** en tu carpeta de inglés, en tinta y con letra clara.
- Colocar nombre y apellido a cada hoja y enumerarlas.
- Saber expresar normas de seguridad empleando el vocabulario específico.
- Participación activa en clase.

Próximo trabajo práctico: SUPERLATIVE ADJECTIVES
