

IPET N° 132 "PARAVACHASCA"

6° AÑO "A"

ESPACIO CURRICULAR: INGLÉS

PROFESORA: MARÍA LAURA ESTÉVEZ

EXÁMEN PREVIO LIBRE

A) READING COMPREHENSION (LEE ESTA LECTURA Y ESCRIBE EL NOMBRE DE CADA OBJETO EN EL DIBUJO)

Welding – Safety Rules

FIG. 1

CAUTION: Welding can be dangerous. Any of these accidents might happen to you: (a) you could be blinded by sparks; (b) you could get an electric shock; (c) your face, body, arms, legs or feet could be burnt; (d) there could be a fire in the workshop.

PROTECTIVE CLOTHING

- 1 A mask or helmet must be worn in electric arc welding. (In gas welding, goggles can be used.)
- 2 Clothes must be kept dry and clean.
- 3 Thick, heavy boots must be worn. These must be made of some insulating material such as rubber.
- 4 Gloves, and apron and a cap must be worn.
- 5 Overalls must have long sleeves and no pockets or cuffs.

WORKSHOP

- 6 The floor must be made of concrete.
- 7 There must be a metal container on the floor for the sparks.

B) TRUE or FALSE? (¿VERDADERO O FALSO? CORRIGE LAS ORACIONES FALSAS DE ACUERDO AL TEXTO DE ARRIBA)

- 1) Welding is dangerous. _____
- 2) You must not wear a mask or helmet. _____
- 3) Clothes must be wet and dirty. _____
- 4) Your boots must be made of rubber. _____
- 5) The floor must be made of wood. _____

COMPARISON OF ADJECTIVES

Usamos el **grado comparativo**, cuando comparamos **2 personas, animales o cosas**.

a) los adjetivos de **1 sílaba**, agregan **"ER"** al **adjetivo**. ("ER" significa "MÁS")

EX: Thomas is **taller than** John = Tomás es más alto que Juan

b) los adjetivos de **3 sílabas**, usan **"MORE"** adelante del **adjetivo**. ("MORE" significa "MÁS")

EX: Gold is **more expensive than** silver = El oro es más caro que la plata

c) los adjetivos de **2 sílabas** que terminan en **"ER"** o **"Y"**, siguen **la regla a**

EX: Music is **easier than** mathematics = Música es más fácil que matemáticas

los adjetivos de **2 sílabas** que terminan en **"FUL"**, **"RE"** o **"OUS"**, siguen **la regla b**

EX: Tina is **more careful than** Mary = Tina es más cuidadosa que María

d) CASOS IRREGULARES

GOOD → BETTER EX: Maradona is **better than** Pelé = Maradona es mejor que Pelé

BAD → WORSE EX: Ronaldo is **worse than** Messi = Ronaldo es peor que Messi

C) READ AND UNDERLINE. (LEE ESTE CUADRO Y TEXTO Y SELECCIONA LAS ORACIONES QUE COMPARAN LAS PROPIEDADES DE ESTOS MATERIALES)

Look at this table. It compares the properties of five engineering materials:

HEAVY	TOUGH	HARD	A GOOD CONDUCTOR
Copper Cast iron Glass Aluminium Rubber	Copper Aluminium Rubber Cast iron Glass	Glass Cast iron Copper Aluminium Rubber	Copper Aluminium Cast iron Glass Rubber
LIGHT	WEAK	SOFT	A POOR CONDUCTOR

Copper is a tough material. It is tougher than rubber.

Aluminium is a light material. It is lighter than glass.

Copper is a good conductor of electricity. It is a better conductor than aluminium.

Cast iron is a heavy material. It is heavier than aluminium.

Rubber is a bad conductor of electricity. It is a worse conductor than cast iron.
